

**Concord Lutheran School**  
**Bensenville, IL**  
Curriculum Guide  
**Seventh Grade**

Welcome to Concord in the name of our Lord Jesus. We believe that communication is vital to the success of our students. Our partnership with parents and families will help your understanding of the school's goals and skills in your child's grade level. As a child of God we value highly the success of our students. This guide is a brief summary of the curriculum that your child will experience at Concord Lutheran School.

**Religion/Confirmation**

*Through the religion curriculum students will continue their lifelong journey in the Christian faith. The relationship God has with us and others is one that is not only lifelong but eternal. It is a living and ongoing process. As people of faith, it is our fervent prayer that the study of the Word of God allows the Holy Spirit to work in and through all who study and work here so that their lives might be one of Christian hope, service, and love.*

Seventh grade students will learn:

- The knowledge of God's Word and growth through the books of the Bible, the Ten Commandments, the Apostles Creed, the Lord's Prayer, and the Sacraments
- About Baptism, and Lutheran History over the ages
- The entire Small Catechism, The Gospels
- Creation and the book of Genesis
- The end times in the book of Revelation
- About being good stewards of their time, talents, and treasures as they serve others and support a mission opportunity with their weekly chapel offering

**Language Arts**

*Through the study of language arts, students will learn to read fluently and understand a broad range of written materials. They must be able to communicate well and listen carefully and effectively. They should develop a command of the language and demonstrate their knowledge through speaking and writing for a variety of audiences and purposes. In addition, students must be able to study, retain, and use information from many sources.*

Students will:

- Apply word analysis strategies to decode unknown words
- Use prefixes, suffixes, and roots to understand word meanings
- Select reading strategies according to the purpose, structure, and genre of text
- Identify and explain the main idea of a text
- Read aloud with fluency and expression
- Use specific information to form questions, verify predictions, and support thinking
- Identify, compare, and contrast story elements
- Analyze, compare, and contrast themes, conflicts, and perspectives
- Use a variety of sentence structures to express thoughts
- Use correct grammar, spelling, punctuation, and structure in writing
- Use the writing process to produce persuasive, narrative, descriptive, and expository written pieces

## 7<sup>th</sup> grade Language Arts continued

- Display attentive listening behaviors and listen for specific purposes
- Ask and respond to questions related to oral presentations
- Prepare and deliver an oral presentation
- Determine appropriateness and usefulness of reference materials for a given topic
- Use available technology as a publishing method for sharing information

## Math

*The mathematics curriculum provides necessary number, problem-solving, and high-order thinking skills that will benefit the students in all phases of their lives. Students will be instructed by challenging them to succeed to the best of their God-given abilities.*

Students will:

- Develop a working knowledge of key vocabulary when speaking and writing about mathematics
- Apply knowledge of mental computation skills to solve problems
- Know squares from 0 to 15
- Determine the prime factorization of a number
- Apply knowledge of divisibility tests, least common multiples, and greatest common factors to solve problems
- Know common decimal, fraction, and percent equivalences between zero and one
- Compute percents of quantities
- Read, write, compare, and order integers, fractions, mixed numbers, decimals, and percents
- Demonstrate an understanding of absolute value
- Apply knowledge of addition, subtraction, multiplication, and division to solve problems
- Solve addition, subtraction, multiplication, and division problems involving numbers in scientific notation
- Calculate and compare the perimeter and area of regular and irregular polygons
- Use perimeter and area formulas for rectangles, squares, and triangles, parallelograms, and trapezoids
- Solve problems using pi when finding the area and circumference of a circle
- Make descriptive statements about data using measures of central tendency and range
- Formulate predictions and draw conclusions from information on graphs, charts, and tables

## **Science**

*The science curriculum emphasizes that God created the universe and is the preserver of all the laws of nature. The interpretation of scientific data is done in accordance with God's Word. The students are exposed to a variety of authentic learning experiences to nurture creative and critical thinking skills. It seeks to enable students to develop these skills and is designed to teach students to seek God in all things and to treat all of God's creation in a loving and respectful manner.*

Students will:

- Know and apply the concepts, principles and processes of scientific inquiry, including problem identification, formulate hypothesis, conduct experiments, observation, data collection, analysis, and conclusion
- Know and apply concepts that describe properties of matter and energy and the interactions between them
- Identify physical and chemical properties and changes of matter: length, mass, volume, density, and weight
- Explain the laws of conservation of mass, motion and energy
- Compare and contrast atoms, molecules, elements, compounds, and mixtures
- Explain and interpret the periodic table
- Know and apply concepts that describe the features and processes of the earth and its resources
- Describe factors effecting weather
- Know and apply concepts that explain the role of the earth and the composition and structure of the universe
- Understand observational astronomy and space exploration

## **Social Studies**

*The social studies curriculum emphasizes the study of the individual Christian's relationships with other human beings and with God's world. The students will learn to respect and appreciate others and our environment as a unique gift from God. Critical thinking skills are practiced so that students learn how to make value judgments and wise decisions.*

Students will:

- Describe geographic features and landforms of the Seven Continents and how they affect society and cultures.
- Explain the role of US Government through the Constitution Test
- Grow in their knowledge of World History
- Understand the role of Mesopotamian, Egyptian, Ancient Asian, Meso-American Civilization, Ancient Greece and Ancient Rome Civilization
